

Dear Town of Winchester Resident:

This letter is to inform you that there will be significant changes coming to your trash and recycling services.

Major Changes:

- You will receive one 95 gallon cart for trash and one 95 gallon cart for SINGLESTREAM** (see below) recycling; to be used with the new fully automated truck.
- The 95 gallon carts will be delivered to your home the week of Dec 15th – 19th 2014 along with additional information.
- The use of the carts is required for your trash and recycling service.
- Your day of service will remain Friday, trash will be weekly and recycling serviced every other week.
- Use of your carts will begin SATURDAY January 3rd, 2015.
- Volumes will be restricted to what fits inside the cart with the lid closed.
- We ask that you keep 3 feet of space around your cart; keep away from mailboxes, vehicles, telephone poles; etc.
- There will also be some routing changes done at this time, please have your containers curbside by **6am** if not the night before to avoid being missed.
- Below is a picture of what your carts will look like.

**Singlestream recycling simply means that you are able to mix all paper, cardboard, plastic, tin and glass in one container. There will be a detailed recycling guideline attached to your carts upon delivery.

If you have any questions, please contact the Town of Winchester or Advanced Disposal Services. We look forward to making this continued partnership a success.

Town of Winchester 920-836-2948
