

Broadband Expansion Service Sign-up Available

US Internet, the grant funded contractor constructing fiber-optic broadband in the Town of Winchester has opened the customer sign-up portal for the Town of Winchester. Details regarding service options are available on their website. Town of Winchester residents living in the planned expansion area interested in the service are encouraged to sign-up to begin the connection process.

www.usinternet.com or usifiber.com/wi

The map below shows the area included in the initial phase of construction. If you live in the mapped area (green) and are interested in the service, please visit the website to sign-up.

USI representatives have indicated a willingness to consider extensions to customers close to but outside of the mapped area. Please call 920-376-5550 to make a request.

What to expect:

USI representatives provided a brief summary of the service connection process as follows:

1. Customer sign-up on website is completed (cost details and service options are provided in the process).
2. USI will call to set up an initial on-site appointment during which they will complete any work inside your home/business and will install a connection box on the exterior of the building.
3. After the frost is out of the ground, USI will bore a connection from your home to the road right-of-way.
4. When the main line service is constructed in front of your home/business, the private line will be connected to the main service line. Construction of the main lines will begin this spring with anticipated completion by the end of the year.

This is a very basic summary of what to expect. Please contact USI for further information.
